## SECTION 2.4: SOLVING MULTI-STEP INEQUALITIES

## Homework:

$\qquad$

## Learning Targets:

2d. Understanding of what inverse operations to preform and the order to perform them

When you multiply or divide by a $\qquad$ you must $\qquad$ the inequality!!!!

No Solution Inequalities
Infinite Solutions Inequalities

Solve and graph.

$$
\frac{x}{5}-2 \geq-6
$$

$8<2(a-3)$
