Section A.2: Solving and Graphing Inequalities
Homework: $\qquad$
Only Rule...
If you $\qquad$ or $\qquad$
by a $\qquad$ number, you $\qquad$ the inequality.
$>$ or $\geq$ shade to the $\qquad$ $<$ or $\leq$ shade to the $\qquad$
$>$ or $<$ is $\mathrm{a}(\mathrm{n})$ $\qquad$ circle
$\geq$ or $\leq$ is $a(n)$ $\qquad$ circle

HINT: When solving and graphing, keep the variable on the left, so that the inequality tells you the direction of the arrow.

No Solutions:
are $\qquad$ inequalities

Infinite Solutions: are $\qquad$ inequalities

Graph each inequality on a number line.

1. $x>-2$
2. $x \leq 3$
3. $4>x$
